Summary

Hi, I'm Tasin — a passionate Full-Stack Web Developer skilled in Next.js, TypeScript, Express, Prisma, and PostgreSQL. I focus on building modern, scalable applications, efficient backend systems, and reusable components while following clean code practices and performance optimization principles. Always exploring new technologies, advanced design patterns, and industry best practices to create user-focused, production-ready web applications and collaborate effectively in development teams.

Skills

- **Frontend** : React, Next.js, TypeScript, Tailwind CSS, Framer Motion, Material UI, Shadcn UI, Ant Design.
- **Backend** : Node.js, Express.js, Prisma, PostgreSQL, MongoDB, Mongoose, Zod, JWT.
- **Tools & Technologies** : Redux Toolkit (RTK Query), GitHub, Better Auth, Firebase, REST APIs, Figma, Vercel, Postman, Git.

Projects

Planora – Event Management Website

[Live-Link](#) | [Client-Repo](#) | [Server-Repo](#)

- Planora is a full-stack event management platform built with modern technologies for scalable and efficient event handling. Developed event search, filtering, pagination, and review & rating system.
- Followed best practices for clean architecture, reusable components, and user-friendly UI design. Implemented role-based dashboards (Admin & User) for managing events, participants, and analytics.
- Integrated secure authentication system using Better Auth. Optimized backend logic using Express.js and Prisma ORM with PostgreSQL for performance and scalability.
- Designed event workflows for public & private events with approval, pending, and payment-required states. .
- **Technology** : nextjs, type-script, redux, express, prisma, postgresql, Better-auth, Zod, stripe, shadcn.

Shoply – Full-Stack E-Commerce Platform

[Live-Link](#) | [Client-Repo](#) | [Server-Repo](#)

- Shoply is a collaborative full-stack e-commerce platform built using the MERN stack with all modern services.
- Followed best practices for writing code re-usable components, focused on user-friendly Ui.
- Role-based dashboards, order tracking admin management, inventory control, product-order-user-review management. Auth, secure APIs, optimized backend logic, reliable status and message .
- **Technology** : next.js, tailwind-CSS, redux, express, nodeJs, mongoDB, mongoose, Zod, jwt, ant-design, radix-ui, firebase, framer-motion, lenis, swiper,

Education

- **Bikrampur Adarshaw University (Under National University).**
Bachelor of Social Science in Political Science (Year : 2024 – Present)

Language

- Bangla - Native
- English - Intermediate
